

Education Is Transforming

ARE YOU PREPARED FOR THE REVOLUTION?

HAVE YOU CONSIDERED CHALLENGES AHEAD FOR YOUR SCHOOL?

NEP 2020 suggests a shift towards skill based learning + Move towards Education 4.0

Evaluating & analyzing learning outcomes for better results

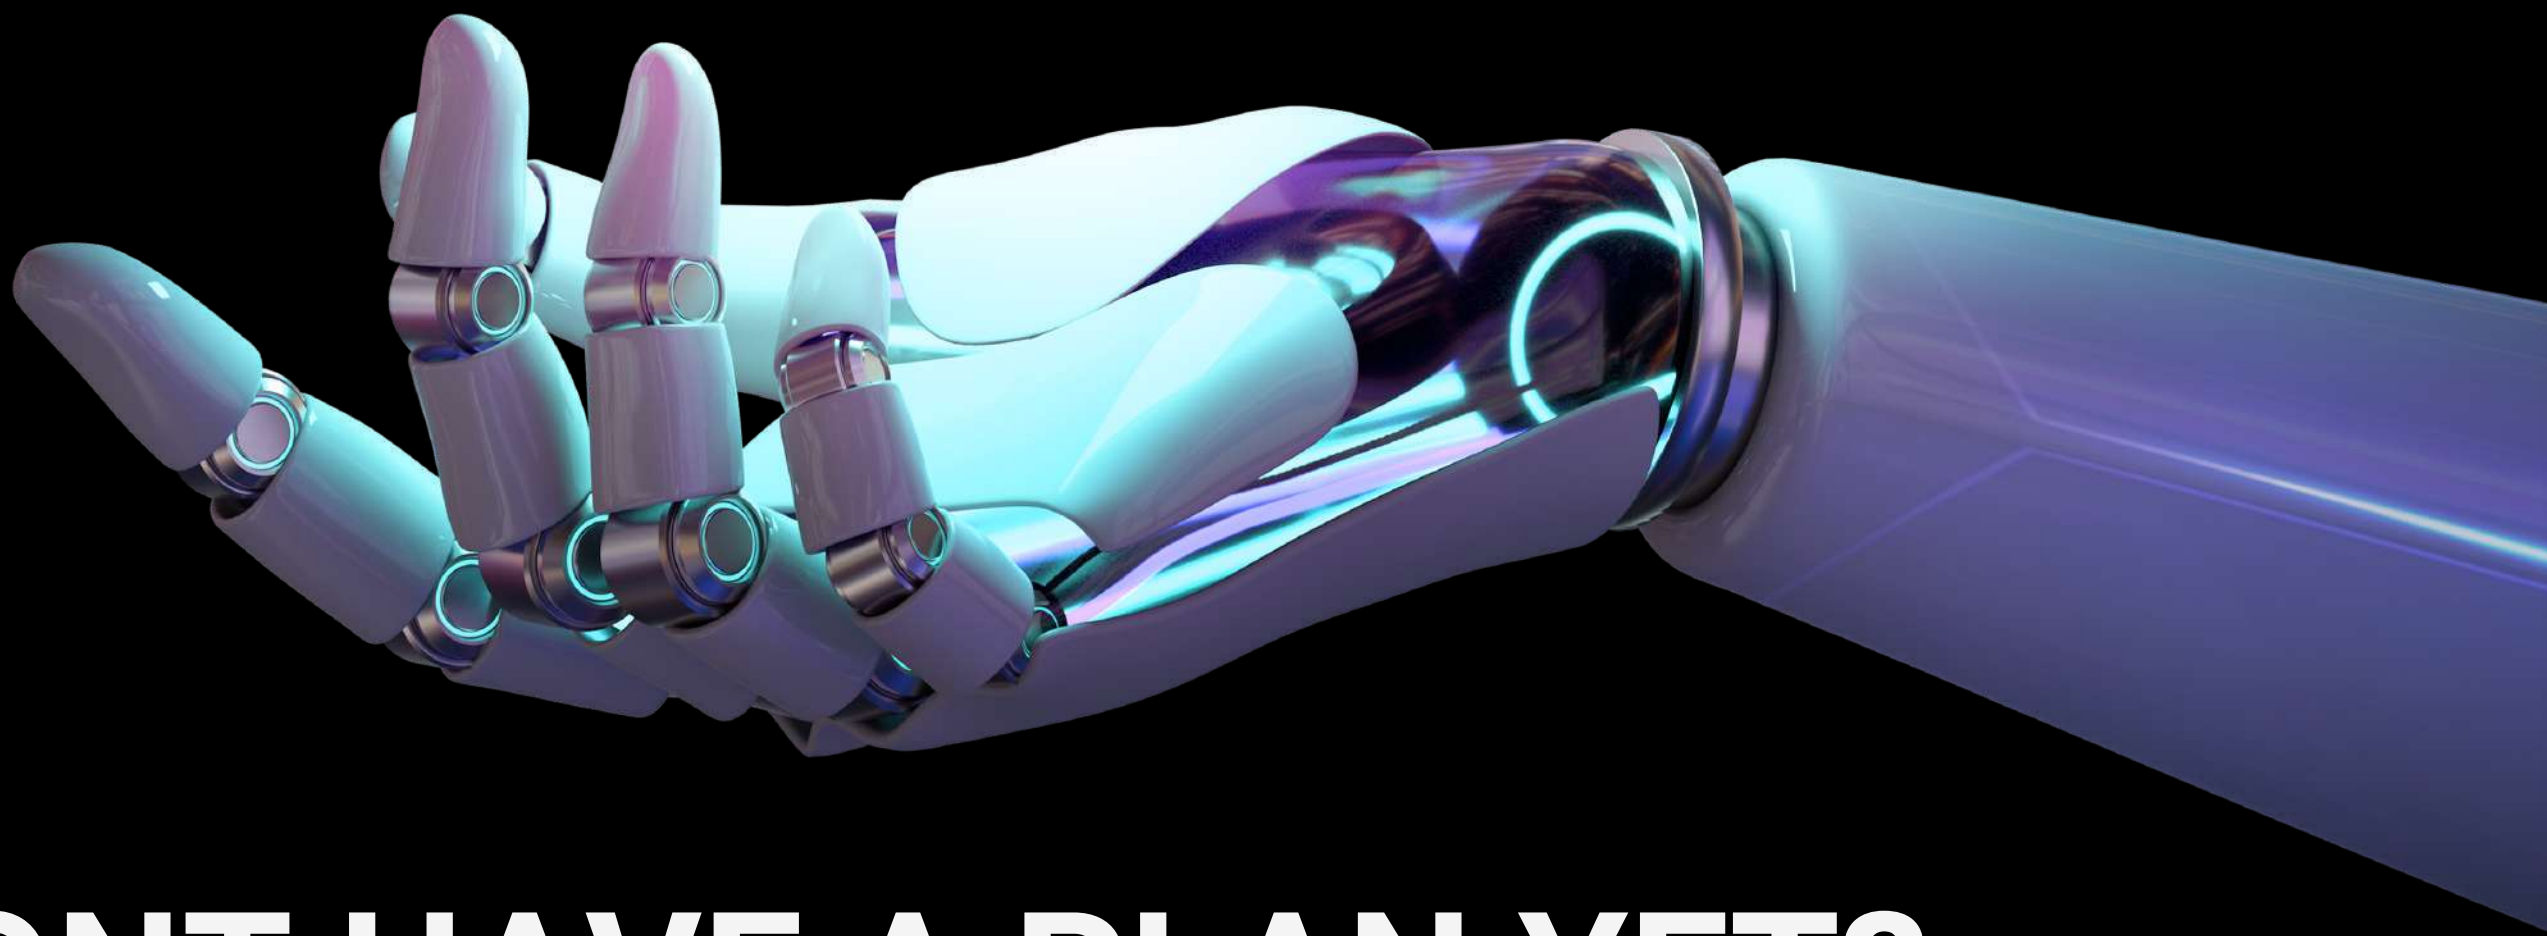

Moving on from the 'one size fits all' approach

Using technology to reduce work load on Teachers

Mass adoption of skill-based education

Outcome Based Education (OBE)

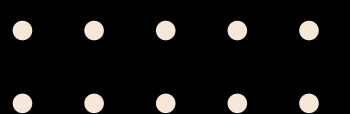

Post-pandemic recovery in terms of education and pandemic proofing education outcomes

DONT HAVE A PLAN YET?

we can help!

Through unique research-based approach we have developed a comprehensive Learning Audit System (LAS) to help you, your students, teachers and your school succeed now and in the future

First of its kind,
Edubull's

LEARNING AUDIT SYSTEM

Our AI-based, diagnostic solution makes teaching and learning easy through our guided content, and skill analysis tools to help teachers audit learning outcomes, assess and monitor every child and the entire class's growth

OUR PROCESS

Diagnostic Assessment

- Concept, tasks and skill based assessments

Analysis

- What, Why & From Where a learning gap emerged
- Skill and concept based detailed analysis

Remedial

- Personalized concept and skill based remedial provided

Hawk-eye Monitoring

- Weakness and strength analysis including all learning outcomes of a student
- Detailed skill and concept analysis reports for parents and teacher
- Class and individual student reports

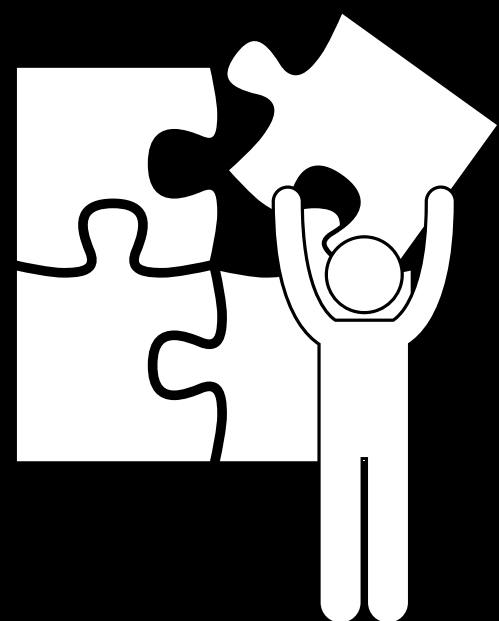

UPGRADE WITH EDUBULL

By providing world-class assessments, analysis and monitoring tools we want to introduce you to a smooth, time-saving and effective method of learning

We help build your school's brand by improving learning outcomes and offering our unique technology, content and analysis tools

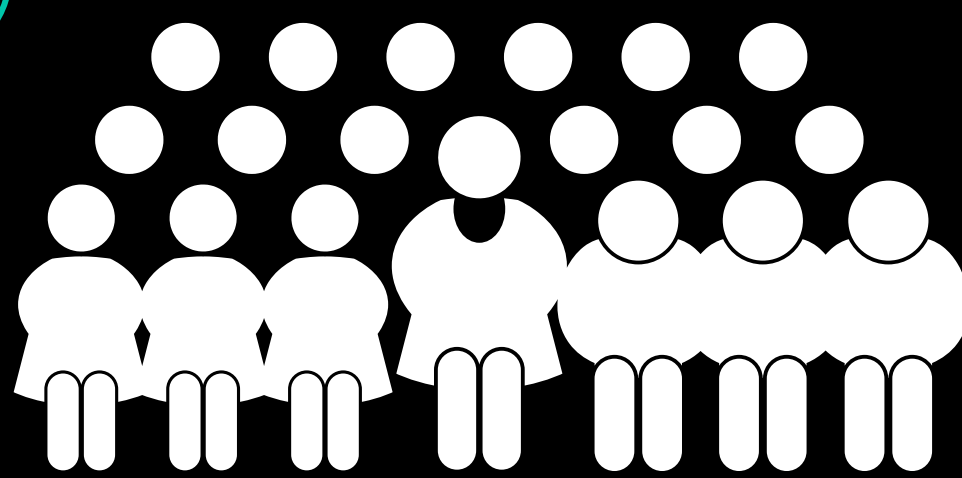

Benefits of Edubull Include

1

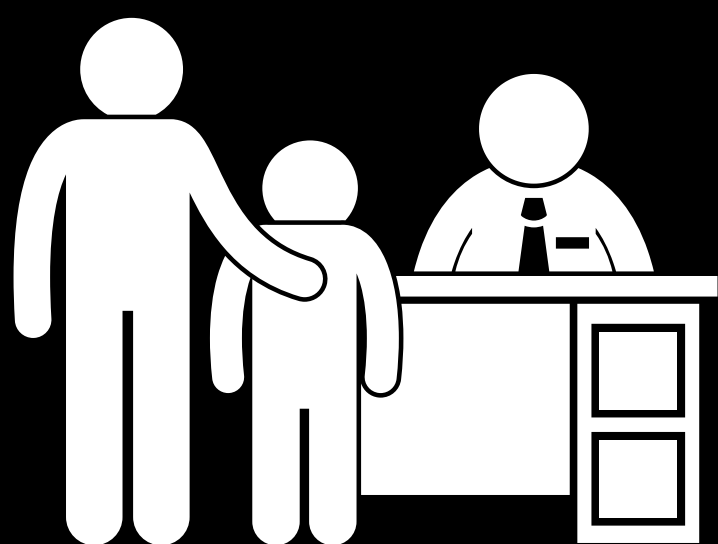

Result oriented branding of the school and trust building with parents

2

Simplifying complex administrative work through teacher-centric approach

3

Bridging the communication gap between parents and teachers

4

Preparing for the future of learning and helping shape future entrepreneurs

5

Through real time monitoring of the student and the entire class, the result also significantly improves

WHAT'S UNIQUE ABOUT US

In a combination first of its kind we have created a blend of AI-based technology, the right content library, and a research-backed approach

Learning Audit System's Process

Our diagnostic assessments are concept and skill-based meant to identify the root causes of a learning gap providing a **360° view of a student's learning** making education personalized for all

Concept & Skill based Learning

We have broken down lessons into concepts to determine skill and concept-based gaps to suggest customised remedial

Adoption of Bloom's Taxonomy

Our technology has integrated Bloom's taxonomy to develop our distinctive solution

Teacher-Centered Approach

Our process is mindfully made for an easy and smooth user experience for teachers not only helping them save time but reducing the considerable workload on them, facilitating the onset of Education 4.0

Hawk Eye Reporting & Monitoring

We provide the school and teachers detailed, personalized reports of every child and/or entire class/batch which includes their strengths and weaknesses as a graphical report with detailed learning charts and outcomes

AI-based Technology

Our technology is created to become your own technological arm to enable the most comprehensive and smooth learning and teaching ecosystem which focuses on the deliverability of better results and academic success all the while making a teacher's job easy

We provide a white label mobile application, web server and LMS solutions tailored to you

Personalised Remedial

Through intellectual skill based assessments we provide analysis of learning and skill-based gaps for each student/ class and suggest a personalized skill and concept remedial

Our Entire Content Library

Edubull has curated a vast content library hosting over

70,000+

Videos + Animations

1,50,000+

Questions

50,000+

Notes

30,000+

Excerises

K-12

WITH EDUBULL EVERY TEACHER, STUDENT, AND PRINCIPAL CAN SOAR HIGHER THAN EVER

Who We Are

Edubull, is the product of a humble vision to change Indian educational landscape through continued research and technology. Edubull is the legacy of a long-running successful software company **Visionet**, which was instituted in **1998** and since having served **1800+ institutions** around the country and has worked closely with the Indian government on various projects impacting the lives of more than **1 million students** by delivering worldclass technological and educational solutions. After years of industry expertise and published research conducted by the founder on utlising technology to better learning outcomes, we pioneered Edubull.

Conceptualized in 2020 and instituted in 2021, Edubull through its existence has made its mission to provide better and overarching learning outcomes to every child in India, by creating purposeful technologies that work for child development to prepare them for lifelong success. Edubull at its core believes that effective learning is done when teachers are supported as well as students through unique avenues. We aim to support teachers in their pursuit of empowering students and preparing them for outcome-based learning in an effective, user-friendly manner.

Edubull aims to continue on its mission to innovate for the good of all to provide accessible, thoughtful and unique solutions for all.

Combining our vision with the industry knowledge of educationalists and tech entrepreneur stalwarts, we aim to challenge traditional paradigms and present to you the next big thing in education, Edubull.
